

WATER-SOLUBLE SPECIAL CLEANING AGENT - POWER CLEAN

This product is a water-soluble cleaning agent that decomposes dirt components against any dirt and quickly peels and disperses. Especially effective for cleaning oily ingredients.

Moreover, it is a cleaning agent that can prevent environmental pollution after drainage and has a microbial degradability (BOD₅) of 100%, which is an excellent special cleaning agent that completely decomposes. Also, unlike conventional fluorine-based cleaning agents and hydrocarbon-based cleaning agents, this cleaning agent is easy to handle.

It is a very economical low-foaming detergent that can be diluted arbitrarily with water depending on the application.

☆ Property

Water-soluble pale-yellow transparent liquid (alkaline)

☆ Compatible with environmental hormones

You can use it with confidence because it does not consist of “65 chemical substances suspected of having endocrine disrupting effects” signed by Ministry of the Environment.
